ORIGINALES

FREQUENTLY ASKED QUESTIONS

Q: What species is the Tango line of doors available in?

A: Doors are available in “Brazilian Mahogany” (Mara Macho) and “Rustic , Walnut” (Yesquero), depending on the style selected. Please refer to the full-line catalog for exact availability. (Note: “Rustic” refers to the door styles, not the grade of the lumber used.)

Q: What thicknesses are available?

A: Mahogany doors are available in 1-3/4” thickness and Walnut doors are available in 1-3/4” or 2-1/4” thickness.

Q: What widths and heights are available?

A: Width and height availability varies by door style, but generally includes: 2’6”, 2’8”, 3’0” and 3’6” widths and 6’8” & 8’0” heights. Please refer to full-line catalog for exact availability.

Q: How are Tango doors constructed?

A: Doors are constructed using solid wood, engineered stile and rail components, featuring a 3/16” veneer over a specie match edge glued core. Panels are edge glued, solid wood.

Q: Are lited doors true divided?

A: All lited doors come standard with simulated lites; grilles are pinned to stiles and rails and are also adhered to the glass with black glazing tape, providing the visual effect of true divided panes.

Q: What types of glass are available?

A: All units come standard with 5/8” clear insulated glass. Optional glass designs include Clear Low E, Hammered, Glacier or Seedy. Units are not available “open for glass”.

Q: What hardware finishes are available?

A: Hinges and flush bolts are available in two finishes – Oil Rubbed Bronze and Satin Nickel. Three-point locking systems are also available.

Q: How are the iron grilles installed?

A: All 5/8” decorative iron grilles are hinged (with set-screw), allowing for easy access when cleaning the glass.

Q: Are the speakeasies decorative or functional?

A: All speakeasies are fully operable and are available with or without a decorative iron grill. (They are fitted with an adhesive-backed weatherstrip.)

Q: What types of custom options are available when it comes to sizes, species, etc...?

A: The Tango line has been designed with simplicity in mind. These semi-custom units allow you to mix and match a variety of standard available upgrades with the added benefits of lower costs and no extended lead times. When your project calls for options not featured in the Tango product offering, we will gladly assist you in quoting custom manufactured units to meet your customer’s requests.
